Objective

Experienced professional with over a decade in software testing and quality assurance across diverse industries. Specialized in leading testing initiatives, shaping infrastructure, and contributing to pre-sales. Proficient in manual and automation testing, and I have designed robust Test Automation Frameworks using Selenium Webdriver, Python, Playwright, Javascript, RobotFramework. I thrive on challenges, collaborate effectively, and maintain an insatiable appetite for learning.

Work Experience

07/2015 - Nowadays

Strategic Systems International

QA Architect / Test Automation Expert

- I steered the ship, ensuring that our Enterprise Self-Storage Project sailed smoothly—on time and on budget. How? By rallying cross-functional teams and applying QA best practices that were both measurable and repeatable.
- Armed with key tools like Pytest, Python, Selenium WebDriver, Robot framework, and Playwright JavaScript, I revolutionized our testing process. The result? A remarkable 60% reduction in regression time across all platforms.
- I took charge of building a solid foundation for quality assurance. From test planning to case design, execution, and defect management, I left no stone unturned.
- Collaboratively, we defined and implemented OKRs (Objectives and Key Results). Our compass? Aligning QA objectives with the broader goals of the organization.

06/2011 - 07/2015

Softech Systems

Sr. Software Test Engineer

- I took charge of creating and prioritizing test cases for large-scale projects, meticulously identifying risks and dependencies.
- Armed with pytest and Selenium, I automated testing processes specifically for health care applications. Efficiency and accuracy were my watchwords.
- Working closely with business users and development teams, I facilitated test case review sessions. My goal? To assess risks to service quality and ensure robust testing.
- I crafted strategic approaches for testing, providing estimates for complex test projects. My focus was always on achieving thorough and effective testing.
- I played a mentorship role, guiding team members in modern methodologies. Additionally, I conducted interviews and provided technical training.

Project

10/2018 - Nowadays

Tenant inc. (Self-Storage Tech Giant)
Lead QA Architect | Test Automation Owner

- I created and implemented a 3-tier architecture for an automation framework in the TenantInc Self-Storage industry project.
- This framework covers web, API, and data migration (backend) testing and is developed using the Robot Framework.
- Selenium/WebDriver is utilized for web and API testing, while Pytest and Python are employed for data migration testing. Playwright JS is being used for E2E Testing.
- Collaborated with stakeholders and external clients for sprint reviews, demos, and show-and-tell sessions.
- Formulated test cases using Testrail and automated the regression suite.
- Managed the CI/CD pipeline for test automation on gitlab using Jenkins.
- Coached team members for Test Automation and troubleshooting.

04/2014 - 09/2015

FTTH and WiMAX based Services | Etisalat
Senior QA Analyst | E2E Testing

Worked as senior tester in Ericsson on Order Care Management tool which was used to implement and handle the complex scenarios for Etisalat Telecom giant. Performed End-to-End testing for different Systems involved in the process of Order management and Activation, Deactivation, Cease, TOSS of FTTH and WiMAX based services.

07/2011 - 06/2014

Business Integration Platform | BMW
QA Engineer | User Acceptance Testing

Worked as a part of team to implement the new Account Management which supports various business models and a short tie-to-market delivery for services or even the roll out into new markets.

Education

06/2006 - 12/2010

BS Computer Science
Government College University, Lahore, Pakistan

Skills

Selenium	Playwright using JS	Monday.com
SQL DB	Postman API Automation	JIRA
Python	ETL Backend Testing	Azure DevOps
Jenkins CI/CD	Mobile Testing	TestRail
Robot Test FW	JavaScript	BrowserStack

Certifications

ISTQB® Certified Tester - CTFL
SCRUM Alliance ® - SCF
Certified in Business Communications
